

Substance Abuse
Patient Outcome Study 2018

Summary of the Processes

The results shown on the following pages demonstrate the effectiveness of Banyan Treatment Center's treatment programs. A large percentage of adults successfully completed treatment and reported continuous abstinence after treatment. Clients, families, and referral sources also reported a high level of satisfaction with programs and services.

The Study

Banyan Treatment Center, a leading national provider of substance abuse and mental health treatment services, conducted a study to determine client outcomes regarding success in recovery following treatment. From this data we were able to study recovery and whole-person outcomes of individuals who completed treatment at Banyan Treatment Center. Client data is self-reported.

"I've had the pleasure of finding my voice here, seeing the beauty South Florida has to offer, meeting people who share my struggle, and my favorite—feeling

Banyan Treatment Center is Joint Commission Accredited and stands as a national leader in the addiction and mental health treatment industry. We have facilities located nationwide, including: Philadelphia, PA, Lauren Run, PA, Boston, MA, Chicago, IL,
